ALISA

Simple and Smart Management of Medical Devices and Supplies

Alisa is the all-in-one tool for healthcare teams to manage preventive maintenance, expiration tracking, user manuals, and the use of rented, owned, or prescribed medical equipment.

✓ **Complete Visibility** ✓ **Safe and Compliant** ✓ **User Friendly**

HOW IT WORKS

Safe, Streamlined and Fully Traceable

✓ Scan the QR code on any device

✓ Instantly access key details and manuals on your phone

✓ Perform maintenance checks with a full activity log

✓ Keep your inventory up to date and under control

✓ Cut down on paperwork and spend more time on patient care

✓ Handle tasks in the mobile app and monitor everything through the webportal

"Alisa has made our daily work so much easier and delivers real benefits every day. I finally feel confident that we're fully in control - and we save a ton of time."

Fanny Hagström, Licensed Physical Therapist

ALISA

Alisa Streamlines Healthcare Operations

Save time
With Alisa, everything is right on your phone. No more juggling spreadsheets or outdated binders. The data is accurate, centralized, and always accessible – regardless of who's on shift.

Lower costs
Responsibility and spending often get spread across departments. Alisa gives you full insight into inventory levels, usage, and the status of every device across your organization.

Stay compliant
Healthcare regulations are getting tougher. Alisa includes built-in compliance tools that make it easy to meet regulatory standards, including traceability and documentation.

Patient safety
An assistive device that doesn't work can have serious consequences for the individual. Alisa shows when and how to perform function checks – this increases patient safety and provides reassurance for both the individual and the care staff.

Time for care
Alisa takes the hassle out of medical device management, so your team can do what they do best – provide high-quality care.

Full traceability
Know where every item is, whether it's been serviced, and who completed the check. See which devices are owned vs. rented – and get alerts when unused rentals should be returned.

What's Under the Hood?

- Cloud-based and fully secure
- So intuitive, your team can start using it with zero training
- Works on its own or integrates with your existing systems
- Quick data import from Excel or other platforms
- Smart, flexible API integrations
- Multiple login options – password or secure e-ID
- No patient data stored
  - Optional connection to EHR systems

"You can tell this system was built for people like us. I honestly can't imagine going back to the way we used to manage equipment."

Fanny Hagström, Licensed Physical Therapist
